## SUMMARY

As a full-stack web developer, I have developed a solid foundation in both front-end and back-end technologies. My strong problem-solving abilities curiosity drive me to constantly learn and stay up to date with the latest industry trends and learn new technologies. I bring a strong work ethic, a quick learning ability, and a dedication to delivering high-quality code.

---

## TECH SKILLS

### Front-end:

- Languages: HTML, CSS, JavaScript
- Libraries: React.js, Three.js, Bootstrap

### Back-end:

- Languages: JavaScript, Python
- Libraries: Node.js, Express.js, Pandas, Flask
- Database: MongoDB, SQL

### Tools:

- Git, GitHub, yarn, NPM, BASH, Auth0, pip

## PROJECTS

### Final Project- Métropole

Repo: <https://github.com/iqrasy/Final-Project-Metropole>

- Created a traveller's guide to Montreal which allows you to book restaurants, hotels, and activities all in one place.
- Using several API's, I stored the data in my database. Also, through backend verification and CRUD. Implemented authentication and authorization using Auth0. Required a lot of problem-solving and attention to detail.

**Technologies:** React.js, MongoDB, Node.js, Express.js, JavaScript, Auth0

### Snake Game

Repo: <https://github.com/iqrasy/snake-game>

- Created a classic snake game. It provides an interactive and visually appealing representation.

- I successfully developed a classic snake game using Python, leveraging the power of Object-Oriented Programming (OOP) for efficient and organized code. The game features a player-controlled snake that moves around the screen. As the snake consumes food, it grows longer, and the objective is to eat as much food as possible without colliding with the boundaries of the game or its own tail. Some key features are score tracking, high score, and collision detection

**Technologies:** Python

## Twitter Clone

Repo: <https://github.com/iqrasy/project-twitter-clone>

- Created a twitter clone which allows you to post tweets, view tweets, like tweets, and view profiles.
- This was done using React Context, API fetches, and REST API's. Wrote clean, efficient, and maintainable code while adhering to best practices. In-depth knowledge of web design principles and user experience design.

**Technologies:** React.js, Node.js, Express.js, JavaScript

---

## EDUCATION

- Concordia University, 2023 – Diploma in Full-Stack Web Development
    - Technologies covered: HTML/CSS, JavaScript, React, Node.js, Express.js, MongoDB, Git, GitHub
  - Udemy, 2023 - 100 Days of Code: The Complete Python Pro Bootcamp for 2023
- 

## WORK EXPERIENCE

### After school coordinator, Royal Vale School

November 2020 – June 2022

- Provide care and safety for the children.
- Planned daily activities.
- Monitor the children during recreational time.
- Ability to maintain focus and control with students in chaotic environments.
- Attention to detail and organization.

### Sales associate, H&M

October 2018 – September 2019

- Operating cash registers and other equipment
- Informing customers about financing options, return policies, and other details.
- Followed opening and closing procedures.
- Organized floor displays to maximize space and call attention to latest merchandise.
